Connect with nature is key to good health!

This belief is the foundation of everything we do at Ambe and it is for this reason that our R&D lab is located at a height of 5500 feet in the Himalayas, to find that perfect Phytoactive.

Through relentless research and use of modern techniques, we extract active compounds from rare herbs that provide therapeutic value and find application in nutraceuticals as well as pharmaceuticals. Moreover, we have the manufacturing capabilities to create innovative products that are market ready and safe to use.

300+ employees

3* manufacturing facilities
